

BUSINESS: A NEW VENTURE, AN EXPANSION

Brazilian Skin Care at Leda's Esthetics

Leda Einstein recently traveled to her native country of Brazil with the intent of learning the most innovative techniques in skin care, meeting with one of the top plastic surgeons in the country.

The hands on training with Dr. Wilson Borges de Cunha gave her a deeper understanding of the skin and how it functions, she said.

A licensed esthetician, Einstein also traveled to Rio de Janeiro, where she met with Dr. Ivo Pitanguy, who is developing a line of anti-aging products.

Returning to the United States, Einstein opened her own skin-care salon, **Leda's Esthetics**, in San Juan, in the **Parvi's Salon** at 31952 Camino Capistrano, Ste. C18.

"I offer clients my expertise and training with Brazilian Touch facials, using the best all natural anti-aging products that work wonderfully for men or women," Einstein said.

You can reach her at 326-3084.

FUTURE FOCUSED CELEBRATES

It was a night of smiles and congratulations, as San Juan Capistrano business, **Future Focused**, hosted an Open House party attended by **Mayor Sam Allevato**. After a recent expansion, Future Focused founders **Jennifer Connellan** and **Anne Luke**, decided it was time to celebrate their success and give back to those who have supported them.

They raffled off over \$4000 in services, with the grand prize of a \$3,000 college counseling package going to one of their loyal patrons, the Logan family.

Mayor Allevato commended the business at the ribbon-cutting ceremony that night saying, "San Juan Capistrano is fortunate to be home to such a meaningful, positive service for our youth."

Future Focused opened its doors in Birtcher Plaza in 2003, and established itself as Orange County's premier life coaching business for teenagers. Since then, they have helped hundreds of stu-

dents experience academic improvement, be accountable to their goals, and take ownership over their future.

"We are absolutely thrilled with how well the students have done in our programs, and we are incredibly grateful to the community for supporting us over the past few years," says Connellan. "Schools have embraced us, and the kids and parents who come here have been amazing in helping us spread the word. The raffle was our way of saying thank you"

Tom Waszak, Principal at **JSerra Catholic High School**, seems equally as grateful to Future Focused.

He says "Future Focused is unique and

innovative in their approach to working with young people. The positive impact they've had on our students is evident in more than just their increased GPAs; I've seen improvements in students' attitudes, self-esteem, and increased levels of confidence. I am extremely appreciative for their commitment to our students."
